Shiraz, Iran | Open to Remote Work & International Relocation | alireza.chehrevar@gmail.com
alichv.com | github.com/alichehrevar | linkedin.com/in/alireza-chehrevar-647893115

PROFESSIONAL SUMMARY

Full-stack developer with 8+ years of experience building, securing, deploying, and optimizing production web and mobile systems. Strong backend expertise in PHP/Laravel, Node.js, and Go, combined with hands-on delivery in React/Next.js, Vue/Nuxt, Flutter, DevOps, server and network configuration, and CI/CD. Experienced in owning products end-to-end across marketplaces, e-commerce, fintech/cashback, LMS, legal-tech, and API-driven mobile platforms, with a practical focus on reliability, performance, security, and maintainable architecture.

CORE SKILLS

Backend: PHP, Laravel, Node.js, Go, REST APIs, Swagger/OpenAPI, authentication, authorization, security workflows, business logic

Frontend: React.js, Next.js, Vue.js, Nuxt.js, TypeScript, JavaScript, HTML5, CSS3, responsive UI implementation

DevOps & Infrastructure: Linux environments, CI/CD, deployments, server and network configuration, production troubleshooting, performance optimization, Git

Data & Mobile: MySQL, MongoDB, SQLite, schema design, query optimization, Flutter, Dart

PROFESSIONAL EXPERIENCE

Full-Stack Developer / DevOps Engineer

Apr 2026 - Present

NitroTech (Nitro Agency) | Shiraz, Iran

- Deliver full-stack development and production support across client projects, working on backend services, modern frontend applications, integrations, and custom template implementation.
- Manage deployment workflows, server and network configuration, production troubleshooting, and operational improvements across multiple web properties.
- Optimize existing and newly delivered projects for speed, stability, maintainability, and responsive behavior across devices.
- Contribute to agency portfolio products including Gianely (e-commerce), PersianFrame (photographer booking platform), and Bekhar Befrosh (online classifieds marketplace).

Full-Stack Developer (Backend-focused)

Sep 2025 - Apr 2026

ParsCoders | Iran

- Hardened the OTP request workflow after identifying abuse and bypass patterns, implementing backend rate limiting and detection logic to reduce spam while preserving legitimate access.
- Built and maintained Laravel/PHP services for a live freelance marketplace and delivered frontend work in Vue, Nuxt, React, and Next.js when required.
- Resolved high-priority production issues and refactored existing pages and core workflows in a high-traffic environment.

Full-Stack Developer (Backend-focused)

Jan 2024 - Sep 2025

ShirazTakhfif | Shiraz, Iran

- Designed and implemented the backend for a cashback and digital wallet system covering online and in-store purchases, balance tracking, and withdrawal workflows.
- Rebuilt the backend and theme layer, improving the GTmetrix grade from E to B and reducing load time from approximately 25 seconds to 4 seconds.
- Maintained production features, integrations, database workflows, and customer-facing pages across the discount and cashback ecosystem.

PROFESSIONAL EXPERIENCE - CONTINUED

Freelance Full-Stack & Mobile Developer

Apr 2018 - Present

Self-Employed | Remote

- Built a Node.js automation backend for cryptocurrency workflows with multiple third-party API integrations and scheduled processing.
- Developed the backend and Swagger-documented API layer for a Flutter application and admin panel serving truck and heavy-vehicle listings.
- Delivered web and mobile systems across e-commerce, education, legal services, and transactional platforms, including query and backend optimization that reduced selected page loads from about 7 seconds to 2.5 seconds.

Project Coordinator & Full-Stack Developer

Apr 2019 - Dec 2020

Comersoot | Iran

- Built a Laravel-based legal-contract platform from the ground up, including database architecture, contract-file sales, custom drafting requests, purchasing flows, and administration features.

Backend Developer

Apr 2018 - Mar 2019

Raica | Iran

- Developed Laravel/PHP business logic and database-driven modules for e-commerce, medical, and elevator installation and service platforms.

SELECTED PROJECTS

Gianely | E-commerce / NitroTech - Specialized commerce platform with custom product and purchasing experiences; contributed to full-stack delivery, template implementation, deployment, and optimization.

PersianFrame | Booking Platform / NitroTech - Online platform for discovering and booking photographers and videographers; contributed to implementation and production delivery.

Bekhar Befrosh | Next.js, React, Custom UI / NitroTech - Responsive online classifieds marketplace with search, category, location, listing, and user-management workflows.

Poolback | Laravel, Next.js - Cashback and digital wallet platform integrated with ShirazTakhfif for online and in-store purchase rewards.

Rug Source | Laravel, Next.js - International e-commerce platform for Persian and modern rugs serving customers and interior-design professionals.

Univly | Laravel, Vue.js - University discovery and international admissions platform designed to streamline search and application workflows.

Longlifestem | Laravel, Bootstrap - Multilingual corporate website with internationalization support, responsive layouts, and database-driven content.
